LumineX 300

ROBOT VACUUM & MOP

8000–15,000 Pa Suction Power

Stronger. Smarter. Spotless.

Suction pressure (measured in Pascals) determines how effectively a robot vacuum can lift dirt, dust, pet hair, and debris.

8,000 Pa is already considered powerful compared with many mainstream robot vacuums.

Up to **15,000 Pa** places the LumineX 300 among the higher-powered consumer robotic cleaners.

THIS LEVEL OF SUCTION IS DESIGNED TO HANDLE:

Fine dust particles

Pet hair

Human hair

Food crumbs

Dirt tracked in from shoes

Debris lodged in carpet fibers

8,000–15,000 Pa
SUCTION POWER

180 MIN
RUNTIME

3000 SQ.FT.
COVERAGE

Spotless Floors. Less Effort.

Model: LumineX 300

Sweeps and mops
at the same time

Auto-switches to mopping
after tank install

Keeps off carpets
during mopping

Why You'll Love It

Saves Time
Cleans and mops
in one go.

Cleaner Floors
Removes dirt
and dust better.

Smart & Safe
Avoids obstacles
and fragile items.

No Water Stains
Mops evenly,
leaves floors dry.

One Robot. Two Jobs. Vacuum and Mop, Together.
