

Two Platforms. One Mission: Fix Implant Billing & Rebate Gaps at Their Source.

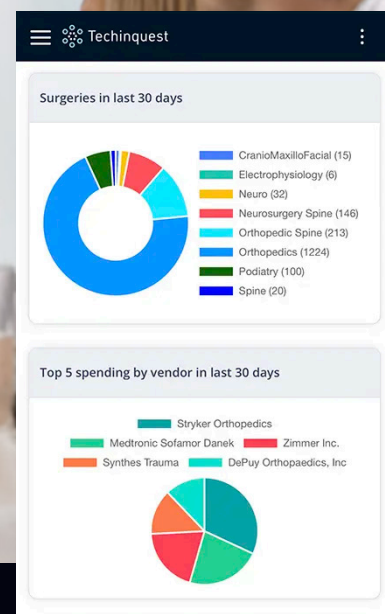

"Most Hospitals Never Realize How Much They're Losing — Until They See the Data."

Software Solutions for Healthcare Supply Chain

Sterile Mate, in exclusive partnership with Tech-inquest, delivers cutting-edge healthcare software solutions designed to strengthen financial performance and ensure operational compliance across hospital systems. Our suite includes the Implant Management Software (IMS) and Healthcare Advanced Rebate Tracking (HART) — two powerful cloud-based platforms engineered to automate manual processes, enforce contract integrity, and recover hidden revenue.

Techinquest Implant Management Software

Simplify Implant Billing. Strengthen Compliance. Protect Revenue.

Techinquest IMS is a HIPAA-compliant, cloud-based platform that automates bill-only requests for hospitals and surgery centers. By integrating hospital policies and contracts directly into its workflow, IMS reduces errors, delays, and compliance risks — ensuring speed, accuracy, and accountability.

Hospitals recover missing revenue using IMS

Why IMS?

Stop implant billing errors and compliance gaps — and unlock revenue hospitals never realized they were losing.

- Gain real-time cost protection with pre-case pricing control
- Achieve full visibility into every implant used across your system

Key Features

- **Mobile-Optimized Interface:** Manage bill-only requests anywhere, anytime.
- **Supplier Portal:** Shifts data entry to vendors, enforcing accountability and compliance.
- **Automated Workflow:** Reduces manual work and speeds up approvals.
- **Contract Compliance:** Ensures every request meets hospital and vendor terms.
- **System Integration:** Connects easily with EHR, ERP, and financial systems.
- **Multi-Tier Pricing:** Simplifies cost control across locations.
- **AI Chatbot & Reporting (Coming Soon):** Quick data access and smart insights.
- **Automated workflows:** cut approval time by 65%”
- **Eliminate overpayments:** on implants and biologics

Healthcare Advanced Rebate Tracking (HART)

Sterile Mate and Techinquest present HART, a cloud-based rebate management platform that helps hospitals capture every eligible dollar. HART automates rebate tracking, validation, and reporting — replacing manual spreadsheets with real-time accuracy and financial visibility.

Most hospitals lose 12–18% of their rebate revenue — HART recovers missed rebate revenue that would otherwise stay hidden.

Key FEATURES

- **Centralized Management:** Track all rebate programs in one place.
- **Supplier Portal:** Improves collaboration and transparency with vendors.
- **Automated Calculations:** Ensures accuracy and eliminates manual errors.
- **Predictive Analytics:** Identifies missed rebate opportunities.
- **Real-Time Reporting:** Provides instant visibility into spend, savings, and compliance.
- **Contract Enforcement:** Protects revenue by aligning every claim with negotiated terms.
- **Seamless Integration:** Connects with purchasing, ERP, and financial systems.

Why HART?

HART turns rebate management into a strategic advantage — helping healthcare systems recover revenue, reduce waste, and strengthen their financial foundation.

Recover Revenue. Reduce Risk. Refocus on Care

CareIMS streamlines implant billing and approval workflows, reducing delays and errors that directly impact reimbursement. HART revolutionizes rebate management through predictive analytics, ensuring hospitals capture every eligible dollar while maintaining complete audit transparency. Together, these solutions help facilities eliminate financial leakage, accelerate cash flow, and achieve measurable returns on technology investment — empowering leadership to focus on patient care, not paperwork.

“After five years of serving the healthcare industry, I’ve learned that real impact goes beyond delivering products — it’s about protecting the financial health of every hospital we serve. Our partnership with Technquest was built to do exactly that — to give healthcare leaders confidence that their operations, compliance, and revenue are secure. When hospitals thrive financially, they can focus fully on what matters most — delivering exceptional patient care.”
