WHAT IS A FOOT CARE NURSE PROVIDER?

A Foot Care Nurse is a professional who has obtained additional, specialized training in the care and treatment of 'routine' foot care concerns.

WHAT DOES THE NURSE DO DURING "ROUTINE" FOOT CARE?

- Reduce nail length
- Reduce nail thickness
- Reduce or remove corns, callus
- Remove the ingrown part of nail, if needed
- Moisturize the skin with lotion

We are here to help you with basic, routine foot care needs. We can handle the thickest, longest toenails and the roughest, toughest corns and calluses. We do not do pedicures (no soaks, polish or sparkles). Our focus is the safety, health & comfort of the client, from a medical foundation. A Foot Care Nurse does not replace a Podiatrist or Medical Doctor, but works collaboratively in understanding the best practice protocols and procedures for a client. If an independent client presents with a condition that is outside the scope of practice of the FCN, they will be assisted in pursuing an appropriate referral. If the client is in Assisted Living or Memory Care, the FCN will generate a progress form and discuss notable findings with the appropriate facility health staff.

WHAT ELSE DOES A FOOT CARE NURSE PROVIDER DO?

- Take a brief history of underlying disease, foot health, current medications
- Examine foot structure, foot health, circulation and skin care issues
- Assess footwear
- Provide ongoing foot care education to the client
- Foot care specialist provide safe, appropriate and beneficial foot care.

HOW IS A FOOT CARE NURSE COMPENSATED?

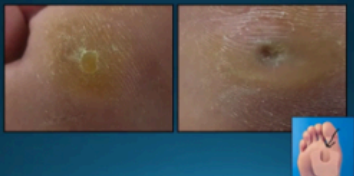

Basic foot care is not covered by Medicare or insurance; it is considered an out of pocket expense. Fee is due at the time of service unless other arrangements have been made w/FCN. (Payments due at time of services)

- FEE SCHEDULE CAN BE PROVIDED.

INFECTION CONTROL & CODE OF ETHICS

- **Members of AFCNA follow a Code of Ethics.**
- **The CDC Guidelines are followed regarding disinfection & sterilization of instruments**

Callous Debridement

Heel Fissures

Porokeratosis – "seed corns" "clogged sweat duct – plugged with keratin" A derm condition

- No permanent treatment possible
- Just routine debridement
