

Tanvir Shaikh

Senior Full-Stack Engineer (React, AWS, Node, Python, Php)

LinkedIn • shaikhtanvir011@gmail.com • [+91-7218347915](tel:+91-7218347915)

Goa India

• tl;dr

- 6+ years experience in shipping production-grade web applications.
- Expert in React, AWS (EC2/S3/Lambda), Javascript, Php & Node.js.
- Shipped 30+ user-facing features and resolved 200+ production bugs in previous project.
- I excel at refactoring legacy React codebases and comfortable working independently with distributed teams.

Work Experience

I've contributed to 15+ projects, ranging from personal to corporate and open source attempts.

 **NextGen Invent**
Senior Software Engineer | March 2025 – Present

Own frontend development across multiple live production products including Feedbos Unison, Rhino Toolhouse, and Galt Pharma.

- Built and **shipped 30+ production-grade, user-facing features** in Feedbos, often working beyond tickets to clarify requirements, edge cases, and UX gaps, while handling high pressure and strict deadlines without compromising stability or code quality.
- **Refactored large, hard-to-maintain codebases**, improving readability, reducing repeated logic, and lowering regression issues.
- **Fixed 200+ bugs** in Feedbos, including long-standing issues that were impacting real users, not just lint or cosmetic problems.
- **Improved UI consistency and overall user flows** by aligning older screens with updated design systems.
- Work closely with product and design teams, balancing speed with maintainability while shipping to real users.

 **Numino Labs Private Limited**
Product Delivery Engineer | March 2022 – Feb 2025

Worked as a frontend-focused engineer across multiple SaaS and platform products, handling features from design through production.

- **Owned end-to-end frontend development** for PromptMule, including UI architecture, **API integrations**, and production deployment.
- Regularly interacted directly with clients to understand requirements, suggest improvements, and iterate on product UX and functionality.
- Supported production releases and handled real-world issues, including bug fixes and customer-reported problems across multiple products.
- **Set up and maintained CI/CD pipelines** and worked with AWS-based infrastructure for front-end deployments.

Handled Projects

- **PromptMule (AI SaaS platform)**
Built the entire platform UI end-to-end using React, including API key management, multi-tenancy and subscription flows. Also developed and deployed the marketing website and handled production releases.
- **MontyCloud (No-code CloudOps platform)**
Fixed 50+ production bugs and improved UI stability and usability for a no-code cloud management product, working closely with backend and infra teams.
- **Gold Price App (React Native)**
Led UI redesign and React Native development for a live gold and silver price app, handled user feedback, fixed production issues, and shipped updates to both Play Store and App Store.

Education

Shree Rayeshwar Institute 2014 - 2018
of engineering & information technology

Bachelor of Engineering in Computer Science

Technical Skills

Frontend

Typescript, React, Nextjs, JavaScript, Tailwind, Mantine, AntD, Redux Toolkit, TanStack, Effector, Jotai, Zustand, Shadcn, WordPress

Backend / Languages

Node.js, Express, Fastify, Prisma, PHP, Laravel

Cloud & DevOps

AWS (EC2, S3, Lambda, CloudFront, Route53, Beanstalk, Load Balancers), GitHub Actions, CI/CD, Redis, Docker/SSH

Tools

Git, Jira, Figma, Postman, Linux, Vercel, Netlify, Photoshop

 **Kilowatt Agency Private Limited**
Software Developer | March 2021 - Feb 2022

Worked as a full-stack developer on client-facing web applications using Laravel, PHP, JavaScript, and Bootstrap.

- Built and maintained production features, handled bug fixes, and supported ongoing client requirements.
- Converted design mockups (Figma / XD) into functional, responsive web pages.
- Integrated third-party APIs and implemented custom backend logic based on project needs.
- Gained hands-on experience working with real clients, delivery timelines, and production constraints.

 **Virtualwebs Servers Pvt. Ltd**
Web Developer / Graphic Designer | Feb 2019 - Feb 2021

Designed and developed web applications using PHP frameworks (Laravel, CodeIgniter) along with HTML, CSS, and JavaScript.

Worked across both development and design tasks, gaining early exposure by building admin panels, handled backend logic, and worked on database integrations. Created visual assets including graphics, banners, and social media creatives as part of project delivery.
